ABOUT ACTIONABLE INSIGHT AI

BUILT FOR THE MISSION. PROVEN IN PRACTICE.

Actionable Insight AI exists because the gap between clinical data and philanthropic impact is not inevitable — it is architectural. We build the architecture to close it.

OUR MISSION

Healthcare philanthropy should be as intelligent as the care that inspires it.

Actionable Insight AI was founded on a conviction that health system philanthropy programs are systematically underserved by the technology available to them. The platforms that exist were not built for this problem — and the professionals responsible for it deserve better tools.

We develop Prysm and Aperion as purpose-built solutions: platforms that understand the specific compliance environment, CRM infrastructure, and operational reality of health system philanthropy. Not adapted SaaS tools. Not consulting engagements. Intelligent platforms with operational support built in.

Our clients are some of the country's most prominent health system philanthropy programs. We serve as strategic architect, technology partner, and operational support — through a single, accountable team.

WHAT WE BELIEVE

THE PRINCIPLES THAT SHAPE THE WORK.

01

INTELLIGENCE, NOT AUTOMATION

We build platforms that make humans more effective — not platforms that replace them. The relationship between donor and fundraiser is irreplaceable and inviolable.

02

BUILT FOR THIS, NOT ADAPTED

Prysm and Aperion are purpose-built for health system philanthropy. Not general fundraising platforms adjusted for healthcare. The specificity is the advantage.

03

COMPLIANCE BY DESIGN

HIPAA compliance is not a feature — it is foundational architecture. Every data flow, integration, and user interaction is designed with PHI protection as a first principle.

04

OUTCOMES, NOT OUTPUTS

We measure our work in realized revenue, first-time major gifts, and fundraiser effectiveness — not platform utilization, API calls, or feature releases.

05

OPERATIONAL SUPPORT INCLUDED

Our platforms are delivered as solution-as-a-service — with playbooks, onboarding, training, and ongoing client success built into the engagement. Not billable extras.

06

PARTNERSHIP OVER VENDOR

We structure our client relationships as long-term partnerships with shared interest in outcomes. When your program grows, we grow with it — that alignment matters.
