- Integration & Systems Q&A 19

Executive Summary

City of Hope stands at a critical juncture in its philanthropic evolution

Current Foundation

- 180 Foundation employees committed to excellence
- World-class grateful patient program
- Enthusiastic physician partners

Key Challenges

- Manual processes limiting scale
- Fragmented systems across departments
- Discovery team managing 1,500 prospects with only 5 officers

The Prysm Solution

Fully integrated ecosystem transforming healthcare philanthropy

- Unified CRM technology
- End-to-end automation
- AI intelligence & prioritization
- Visual management dashboards
- Omnichannel engagement
- Unlimited operational and frontline support

Current State Challenges

Fragmented Systems
Teams toggle between CRM, Tableau, email, and manual processes

Limited Scale
Cannot identify and qualify grateful patients at needed volume

Physician Trust Deficit
Past negative experiences require systematic rebuilding

No Unified View
Multiple departments contact same physicians without coordination

Manual Reporting
Labor-intensive processes limit strategic insights

Status Quo

- **Missing millions** in philanthropic opportunities
- **Physician partner attrition** due to poor experiences
- **Discovery team burnout** from manual processes
- **Inability to compete** with digitally-transformed peers

Functional Assessment Overview

Complete Coverage Across All Functions

Prysm provides comprehensive capabilities across every critical area of philanthropic operations, ensuring no gaps in your transformation journey.

- **Major Principal Giving:** Full donor lifecycle management
- **Patient Discovery:** AI-powered identification
- **Prospect Research:** Integrated wealth intelligence
- **AI & Analytics:** Predictive modeling & insights
- **Clinician Engagement:** Physician partnership tools
- **General Discovery:** Pipeline optimization

Key Benefit: Unified platform and technology ecosystem eliminates silos and creates seamless workflows across all departments.

Major & Principal Giving

Strategic Portfolio Intelligence

Portfolio Management

Pipeline Visibility
Real-time stage progression

Gift Officer Dashboards
Individual performance metrics

Moves Management
Systematic cultivation tracking

Capacity Analysis
Portfolio balance optimization

Performance Analytics

Conversion Metrics
Qualification to solicitation rates

Activity Benchmarks
Team productivity standards

Stage Duration Analysis
Cycle time optimization

ROI Tracking
Program efficiency metrics

Patient Discovery - Team Collaboration

Seamless Team Workflow

1. **Smart Assignment**
   Auto-route to discovery team
2. **Omnichannel Outreach**
   Email, phone, text, mail
3. **Clear Handoffs**
   GO to DO team transitions
4. **Full Visibility**
   Track patient journey across teams
5. **Role-Based Access**
   Specialized team workflows

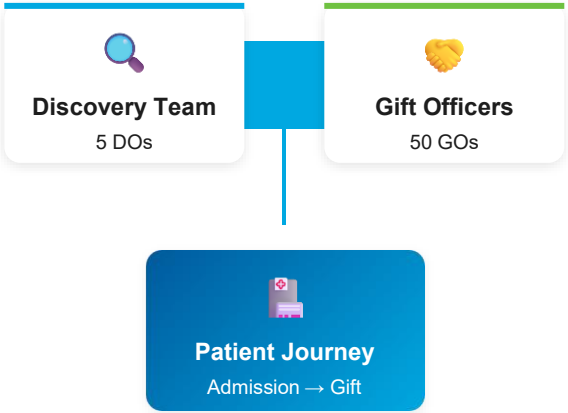
Seamless Team Collaboration

DO Team: Initial qualification

GO Team: Relationship building

Automated: Task routing

Tracked: Full journey visibility



Automated Segmentation

MG/PG: Major/Principal Giving

PPLP: Planned Giving

AG/LAG: Annual & Leadership Giving

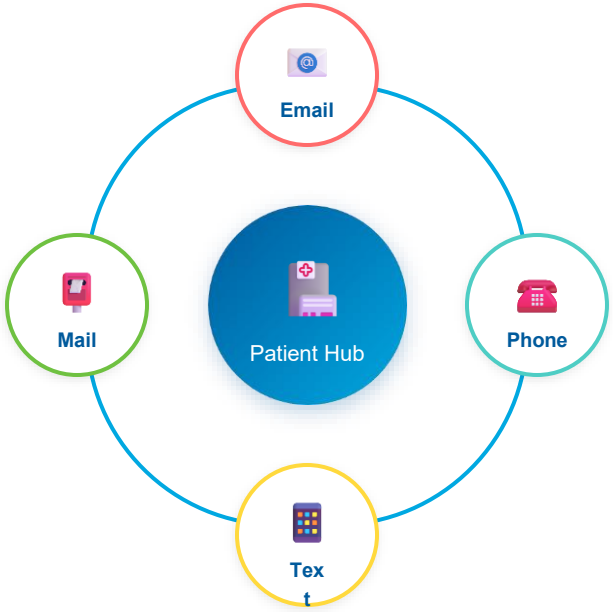
Patient Discovery - Omnichannel Engagement

Omnichannel Patient Engagement

1. **Centralized Triage**
   Discovery team hub
2. **Channel Preference**
   Patient-preferred contact
3. **Parallel Processing**
   Multiple patients simultaneously
4. **Escalation Paths**
   DO to GO when qualified
5. **Unified Timeline**
   All touchpoints visible

Omnichannel Patient Engagement

- **Email:** 8.5% response
- **Text:** 45% response
- **Phone:** 85% connect
- **Mail:** 1.5% response



Research (Prospect Research)

Intelligence-driven prospect identification and qualification

Research Capabilities

Wealth Screening

Automated wealth analysis across multiple sources

Biographical Intelligence

Complete prospect profiles with interests & affinities

Relationship Mapping

Connection discovery and network analysis

Philanthropic History

Giving patterns and capacity modeling

Data Integration

WealthEngine

Windfall

iWave

RelSci

Key Benefits

- Automated updates
- Multi-source validation
- Real-time scoring

AI & Analytics - Vendor Integration

Best-in-Class Intelligence Stack

💰 Windfall
Wealth intelligence & propensity modeling with 4.2M profiles

🧠 Einstein AI
Predictive analytics & automated recommendations

📍 GeoPointe
Geographic visualization & territory planning

🔍 DonorSearch
Philanthropic history with 30M+ giving records

Combined Platform Performance

Open Standards - RESTful API design
Bi-Directional Sync - Real-time data
Multi-Source - Unified data layer
Enterprise-Ready - SOC 2 compliant

AI-Powered Patient Identification

1. **Admission Screening**
   Real-time processing
2. **AI Scoring & Analysis**
   24-48 hours
3. **Priority Assignment**
   Day 3
4. **Gift Officer Outreach**
   Days 5-10
5. **Qualification Complete**
   Day 12

Clinician Engagement

Clinician-Driven Philanthropy at Scale

Strategic Alignment

Service Line Optimization
Focus resources on high-impact specialties

Clinician Segmentation
Tier physicians by referral potential

Panel Prioritization
Auto-rank patients by capacity and affinity

Operational Excellence

Smart Referral Routing
Data-driven patient assignments

Rapid Qualification
Streamlined referral assessment workflow

Performance Reporting
Real-time clinician and service line metrics

Salesforce Platform Benefits

Scalable
Millions of records, thousands of users

Why Salesforce?
World's #1 CRM Platform

AppExchange
4,000+ integrations ready

Modular
Future-proof architecture

HIPAA
Healthcare-grade security

User Experience
Intuitive interface

Next Steps

Recommended actions for City of Hope leadership

1. Approve Prysm implementation for FY 2025
2. Communicate vision to stakeholders
3. Vet and confirm modular AI and research components
4. Confirm implementation and training timeline
5. Confirm and finalize City of Hope Prysm Playbook
6. Super User Go-Live

"Prysm isn't just a platform—it's the catalyst for City of Hope's next era of philanthropic excellence."

Transform potential into impact

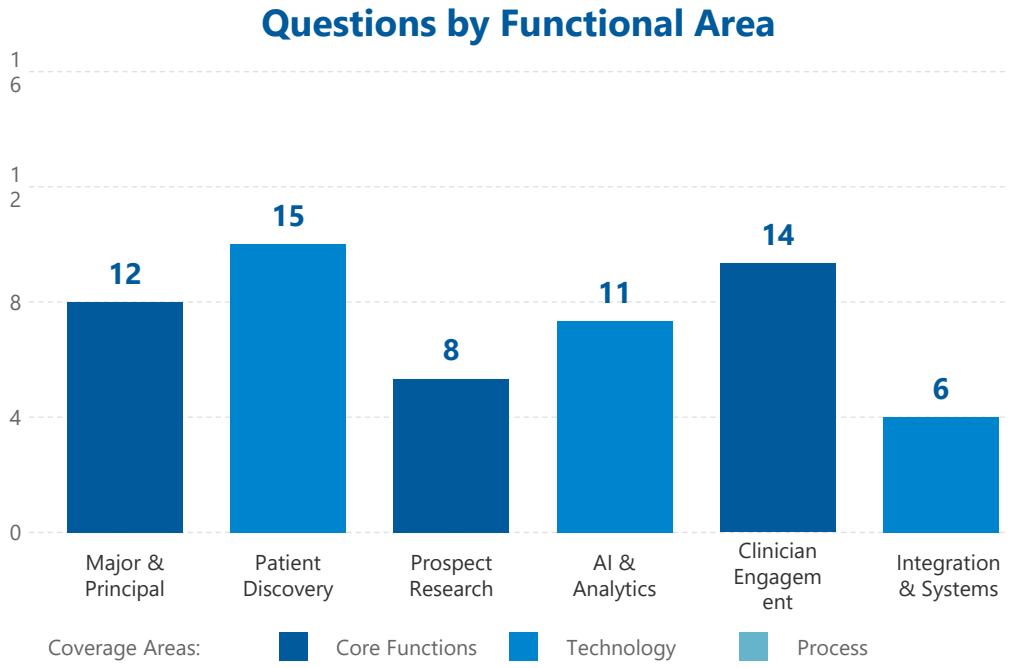
Discovery Questions & Responses

Detailed Q&A by Functional Area

Discovery Questions Analytics

Functional Area Distribution Analysis



TOTAL DISCOVERY QUESTIONS

66

Across 6 functional areas

Category Distribution

Patient-Facing Functions	**42%**
Portfolio Management	**18%**
Technology & Analytics	**26%**
Research & Intelligence	**14%**

KEY FOCUS AREAS

- Patient Discovery (23%) - Highest priority
- Clinician Engagement (21%) - Strategic focus
- AI & Analytics (17%) - Technology enabler

Major Principal Giving - Q&A

Q: Can Prysm handle non-patient donors?

A: Yes, full support for all donor types

Q: Does it include families?

A: Yes, includes family connections and householding

Q: Can we track faculty relationships?

A: Yes, comprehensive faculty tracking

Q: GO activity dashboards?

A: Yes, includes opportunity and activity/performance dashboards

Q: Track physician involvement in gifts?

A: Yes, full physician attribution tracking

Q: Integrate ALL CRM data?

A: Yes, complete CRM integration

Patient Discovery/Qualification - Q&A

Q: Can GOs self-serve prioritized lists?

A: Yes, this is exactly what Prysm does

Q: Automate physician-patient lists?

A: Yes, fully automated physician panel prioritization

Q: Automate handoffs?

A: Yes for patient prospects

Q: All discovery in Prysm?

A: DOs work in Prysm for patients, AH for non-patients

Q: Auto-assign with bios?

A: Yes, can auto-assign prospects with bios via Research workflows

Q: Primary system?

A: Primary for patient lists, AH remains for non-patients

Research (Prospect Research) - Q&A

Q: Which wealth screening vendors?

A: WealthEngine, Windfall, or iWave available

Q: Service line information available?

A: Yes - to review with COH Prospect Research team

Q: Pull from AH and RelSci?

A: Yes from external sources, profiles limited

Q: Automated biographical updates?

A: Yes, daily synchronization of prospect data

Q: Philanthropic history tracking?

A: Yes, comprehensive giving history analysis

Q: Multi-source validation?

A: Yes, cross-reference multiple data sources

AI & Analytics - Q&A

Q: Combined Epic + CRM scoring?

A: Yes, uses AH Capacity Rating as input

Q: Pull external wealth data?

A: Yes - WealthEngine, Windfall, or iWave available

Q: Pull from AH and RelSci?

A: Yes from external sources, profiles limited

Q: AI generate summaries?

A: Einstein AI option available but limited by data

Q: Physician/service insights?

A: Will surface physicians, service lines TBD

Q: Recommend new physicians?

A: Yes, will surface physicians to consider

Clinician & Patient Engagement - Q&A

Q: Track clinician participation?

A: Yes, full participation tracking

Q: Provide donor insights to clinicians?

A: Yes, shareable insights available

Q: Show referral impact?

A: Yes, impact reporting included

Q: ID high-potential clinicians?

A: Yes, identifies top physician partners

Q: Automate physician capacity reports?

A: Yes, automated reports available

Q: GO/physician dashboards?

A: Yes, comprehensive dashboards for both

Integration & Systems - Q&A

Q: How will systems talk?

A: Daily synchronization between systems

Q: What data flows?

A: Bi-directional data flow, to be defined in discovery

Q: Service line info available?

A: Yes – to review with COH Prospect Research and Leadership

Q: Program Manager assigned?

A: Yes, dedicated PM will be assigned

Q: AH automations?

A: To be determined based on Prysm outcomes

Q: Which wealth vendor?

A: TBD - WealthEngine, Windfall, or iWave options

Major Principal Giving Capabilities

Core Capabilities

✓ Patient Qualification Management

Full support for all donor types

✓ Family Connections

Complete family tracking

✓ Faculty Relationships

Physician engagement tracking

Impact for City of Hope

- Unified patient donor view
- Sustainable pipeline development at scale
- Physician partnership
- Corporate tracking
